INDEPENDENT AUDITORS' REVIEW REPORT TRANSLATED FROM CHINESE

PWCR26000093

To the Board of Directors and Shareholders of Formosa Chemicals & Fibre Corporation

Introduction

We have reviewed the accompanying consolidated balance sheets of Formosa Chemicals & Fibre Corporation and subsidiaries (the “Group”) as at June 30, 2026 and 2025, and the related consolidated statements of comprehensive income for the three-month and six-month periods then ended, as well as the consolidated statements of changes in equity and of cash flows for the six-month periods then ended, and notes to the consolidated financial statements, including a summary of material accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, “Interim Financial Reporting” that came into effect as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of Review

We conducted our reviews in accordance with the Standard on Review Engagements 2410, “Review of Financial Information Performed by the Independent Auditor of the Entity” of the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As explained in Notes 4(3) and 6(7), the financial statements of certain insignificant consolidated subsidiaries and investments accounted for using equity method were not reviewed by independent auditors. Those statements reflect total assets (including investments accounted for using equity method) of NT\$98,848,999 thousand and NT\$93,693,273 thousand, constituting 14% and 20% of the consolidated total assets, and total liabilities of NT\$22,053,140 thousand and NT\$22,965,217 thousand, both constituting 13% of the consolidated total liabilities as at June 30, 2026 and 2025, respectively, and total comprehensive income (loss) (including share of profit or loss of associates and joint ventures accounted for using equity method and share of other comprehensive income (loss) of associates and joint ventures accounted for using equity method) of NT\$1,049,275 thousand, (NT\$3,336,054) thousand, NT\$2,845,606 thousand and (NT\$3,555,888) thousand, constituting 1%, 19%, 2% and 28% of the consolidated total comprehensive income (loss) for the three-month and six-month periods then ended, respectively.

Qualified Conclusion

Except for the adjustments to the consolidated financial statements, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries and investments accounted for using equity method been reviewed by independent auditors as described in the Basis for qualified conclusion section above, based on our reviews and the reports of other independent auditors (refer to the Other matter section), nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as at June 30, 2026 and 2025, and of its consolidated financial performance for the three-month and six-month periods then ended, and of its consolidated cash flows for the six-month periods then ended, in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, “Interim Financial Reporting” that came into effect as endorsed by the Financial Supervisory Commission.

Other matter – reviews of the other independent auditors

We did not review the financial statements of certain investments accounted for under the equity method which were reviewed by other auditors. Therefore, our conclusion expressed herein, insofar as it relates to the amounts included in respect of these associates, is based solely on the reports of the other auditors. The balance of these investments accounted for under the equity method amounted to NT\$117,179,549 thousand and NT\$69,159,263 thousand, constituting 16% and 15% of the consolidated total assets as at June 30, 2026 and 2025, respectively, and the comprehensive income (loss) recognised from associates and joint ventures accounted for under the equity method amounted to NT\$27,047,724 thousand, (NT\$2,088,773) thousand, NT\$34,169,384 thousand and (NT\$655,193) thousand, constituting 18%, 12%, 19% and 5% of the consolidated total comprehensive income (loss) for the three-month and six-month periods then ended, respectively.

FORMOSA CHEMICALS & FIBRE CORPORATION AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
SIX MONTHS ENDED JUNE 30, 2026 AND 2025

(Expressed in thousands of New Taiwan dollars, except as otherwise indicated)

1. History and Organisation

Formosa Chemicals & Fibre Corporation (the “Company”) was founded on March 5, 1965. The Company and its subsidiaries (together referred herein as the “Group”) now has eight business divisions, namely First Chemical Division, Petrochemicals Division, Third Chemical Division, Plastics Division, Textile Division, First Fiber Division and its subsidiaries, Second Fiber Division, and Engineering & Construction Division. The Group’s major businesses are production and sales of petrochemical products, including PTA, PS, AN, Butadiene, SM polymer, SM, benzene, toluene, p-xylene (PX) and o-xylene (OX), as well as nylon fiber, and rayon staple fiber. The Group is also engaged in spinning, weaving, dyeing and finishing.

2. The Date of Authorisation for Issuance of the Financial Statements and Procedures for Authorisation

These consolidated financial statements were authorised for issuance by the Board of Directors on August 7, 2026.

3. Application of New Standards, Amendments and Interpretations

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS[®]”) Accounting Standards that came into effect as endorsed by the Financial Supervisory Commission (“FSC”)

New standards, interpretations and amendments endorsed by the FSC and became effective from 2026 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Specific provisions of Amendments to IFRS 9 and IFRS 7, ‘Amendments to the classification and measurement of financial instruments’	January 1, 2026
Amendments to IFRS 9 and IFRS 7, ‘Contracts referencing nature-dependent electricity’	January 1, 2026
IFRS 17, ‘Insurance contracts’	January 1, 2023
Amendments to IFRS 17, ‘Insurance contracts’	January 1, 2023
Amendment to IFRS 17, ‘Initial application of IFRS 17 and IFRS 9 – comparative information’	January 1, 2023
Annual Improvements to IFRS Accounting Standards—Volume 11	January 1, 2026

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

Specific provisions of Amendments to IFRS 9 and IFRS 7, 'Amendments to the classification and measurement of financial instruments'

- A. Clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion, covering contractual terms that can change cash flows based on contingent events (for example, interest rates linked to ESG targets), non-recourse features and contractually-linked instruments.
- B. Add new disclosures for certain instruments with contractual terms that can change cash flows (such as some instruments with features linked to the achievement of environment, social and governance (ESG) targets), including a qualitative description of the nature of the contingent event, quantitative information about the possible changes to contractual cash flows that could result from those contractual terms and the gross carrying amount of financial assets and amortised cost of financial liabilities subject to these contractual terms.
- C. Clarify the date of recognition and derecognition of some financial assets and liabilities, with a new exception relating to the derecognition of a financial liability (or part of a financial liability) settled through an electronic cash transfer system. Applying the exception, an entity is permitted to derecognise a financial liability at an earlier date if, and only if, the entity has initiated a payment instruction and specific conditions are met.
The conditions for the exception are that the entity making the payment does not have:
 - (a) the practical ability to withdraw, stop or cancel the payment instruction;
 - (b) the practical ability to access the cash used for settlement; and
 - (c) significant settlement risk.
- D. Update the disclosures for equity instruments designated at fair value through other comprehensive income (FVOCI). The entity shall disclose the fair value of each class of investment and is no longer required to disclose the fair value of each investment. In addition, the amendments require the entity to disclose the fair value gain or loss presented in other comprehensive income during the period, showing separately the fair value gain or loss related to investments derecognised during the reporting period and the fair value gain or loss related to investments held at the end of the reporting period; and any transfers of the cumulative gain or loss within equity during the reporting period related to the investments derecognised during that reporting period.

(2) Effect of new issuances of or amendments to IFRS Accounting Standards as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC and became effective from 2027 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
IFRS 18, 'Presentation and disclosure in financial statements'	January 1, 2027 (Note 1)
IFRS 19, 'Subsidiaries without public accountability: disclosures'	January 1, 2027
Amendments to IAS 21, 'Translation to a hyperinflationary presentation currency'	January 1, 2027
Amendments to IAS 28, 'Amendments to the fair value option in IAS 28 investments in associates and joint ventures'	January 1, 2027 (Note 2)

Note 1 : The entities shall apply IFRS 18 starting from January 1, 2028. Additionally, entities can choose to adopt IFRS 18 earlier.

Note 2 : The entities shall apply the amendment simultaneously with IFRS 18.

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

IFRS 18, 'Presentation and disclosure in financial statements'

IFRS 18, 'Presentation and disclosure in financial statements' replaces IAS 1. The standard introduces a defined structure of the statement of profit or loss, disclosure requirements related to management-defined performance measures, and enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes.

(3) IFRS Accounting Standards issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRS Accounting Standards as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by International Accounting Standards Board
IFRS 20, 'Regulatory assets and regulatory liabilities'	January 1, 2029

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

4. Summary of Material Accounting Policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and the International Accounting Standard 34, ‘Interim Financial Reporting’ that came into effect as endorsed by the FSC.

(2) Basis of preparation

A. Except for the following items, the consolidated financial statements have been prepared under the historical cost convention:

- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
- (b) Financial assets at fair value through other comprehensive income.
- (c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC® Interpretations, and SIC® Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

- (a) All subsidiaries are included in the Group’s consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
- (b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

- (d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.
- (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

(4) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in New Taiwan dollars, which is the Company's functional and the Group's presentation currency.

A. Foreign currency transactions and balances

- (a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.
- (b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.

- (c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
- (d) All foreign exchange gains and losses are presented in the statement of comprehensive income within 'other gains and losses'.

B. Translation of foreign operations

- (a) The operating results and financial position of all the group entities, associates and jointly controlled entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
 - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
 - ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and
 - iii. All resulting exchange differences are recognised in other comprehensive income.
- (b) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(5) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - (a) Assets that are expected to be realised, or are intended to be sold or consumed in the normal operating cycle;
 - (b) Assets that are held primarily for the purpose of trading;
 - (c) Assets that are expected to be realised within twelve months after the reporting period;
 - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities for at least twelve months after the reporting period.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
 - (a) Liabilities that are expected to be settled in the normal operating cycle;
 - (b) Liabilities that are held primarily for the purpose of trading;

- (c) Liabilities that are due to be settled within twelve months after the reporting period;
- (d) It does not have the right at the end of the reporting period to defer settlement of the liability at least twelve months after the reporting period.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the definition above and are held for the purpose of meeting short-term cash commitments in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income. Financial assets at amortised cost or fair value through other comprehensive income are designated as at fair value through profit or loss at initial recognition when they eliminate or significantly reduce a measurement or recognition inconsistency.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value, and recognises the gain or loss in profit or loss.
- D. The Group recognises the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(8) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:
 - (a) The objective of the Group's business model is achieved both by collecting contractual cash flows and selling financial assets; and
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.

C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value:

- (a) The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.
- (b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognised in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

(9) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:
 - (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.
- D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(10) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(11) Impairment of financial assets

For accounts receivable or contract assets that have a significant financing component, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

(12) Derecognition of financial assets

The Group derecognises a financial asset when one of the following conditions is met:

- A. The contractual rights to receive the cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows of the financial asset have been transferred and the Group has transferred substantially all risks and rewards of ownership of the financial asset.
- C. The contractual rights to receive cash flows of the financial asset have been transferred and the Group has not retained control of the financial asset.

(13) Leasing arrangements(lessor)-operating leases

Lease income from an operating lease (net of any incentives given to the lessee) is recognised in profit or loss on a straight-line basis over the lease term.

(14) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average method. The cost of finished goods and work in process comprises raw materials, direct labour, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(15) Investments accounted for using equity method /associates

- A. Associates are all entities over which the Group has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognised at cost.
- B. The Group's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
- C. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Group's ownership percentage of the associate, the Group recognises the Group's share of change in equity of the associate in 'capital surplus' in proportion to its ownership.
- D. Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

- E. In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under the equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Group's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.
- F. Upon loss of significant influence over an associate, the Group remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognised in profit or loss.
- G. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate, are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it retains significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
- H. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss proportionately.
- I. At the balance sheet date, the Group performs an impairment test for an investment in an associate when there is an indication that the investment may be impaired. The entire carrying amount of the investment (including goodwill) is tested for impairment as a single asset, by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment. Any reversal of impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

(16) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalised.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

- C. Land is not depreciated. Other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each balance sheet date. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

Land improvements	3 ~ 15 years
Buildings	10 ~ 60 years
Machinery and equipment	5 ~ 25 years
Transportation equipment	3 ~ 15 years
Other equipment	2 ~ 15 years

(17) Leasing arrangements (lessee) — right-of-use assets / lease liabilities

- A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease term.
- B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are comprised of Fixed payments, less any lease incentives receivable; The Company subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.
- C. At the commencement date, the right-of-use asset is stated at cost comprising the amount of the initial measurement of lease liability; The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term.
- When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.
- D. For lease modifications that decrease the scope of the lease, the lessee shall decrease the carrying amount of the right-of-use asset and remeasure the lease liability to reflect the partial or full termination of the lease, and recognise the difference in profit or loss.

(18) Intangible assets

A. Computer software

Computer software is stated at cost and amortised on a straight-line basis over its estimated useful life.

B. Goodwill

Goodwill arises in a business combination accounted for by applying the acquisition method.

(19) Impairment of non-financial assets

- A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognising impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.
- B. The recoverable amounts of goodwill, intangible assets with an indefinite useful life and intangible assets that have not yet been available for use are evaluated periodically. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. Impairment loss of goodwill previously recognised in profit or loss shall not be reversed in the following years.
- C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(20) Borrowings

Borrowings comprise long-term and short-term bank borrowings and other long-term and short-term loans. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(21) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(22) Financial liabilities at fair value through profit or loss

- A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorised as financial liabilities held for trading unless they are designated as hedges.
- B. At initial recognition, the Group measures the financial liabilities at fair value. All related transaction costs are recognised in profit or loss. The Group subsequently measures these financial liabilities at fair value with any gain or loss recognised in profit or loss.

(23) Bonds payable

Ordinary corporate bonds issued by the Group are initially recognised at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from bonds payable, which is amortised to profit or loss over the period of bond circulation using the effective interest method as an adjustment to 'finance costs'.

(24) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(25) Non-hedging derivatives

Non-hedging derivatives are initially recognised at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognised in profit or loss.

(26) Provisions

Under the Climate Change Response Act and its regulations in the ROC, carbon fees levied are not applicable under IFRIC 21, 'Levies' but are recognised and measured in accordance with IAS 37, 'Provisions, Contingent Liabilities and Contingent Assets'. If the estimated annual emissions are probable to exceed the threshold for levying, liabilities in relation to emission fees are estimated and accrued based on the proportion of emissions already incurred to the estimated annual emissions in the interim financial statements.

(27) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Group uses interest rates of government bonds (at the balance sheet date) instead.
- ii. Remeasurements arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as other equity.
- iii. Past service costs are recognised immediately in profit or loss.
- iv. Pension cost for the interim period is calculated on a year-to-date basis by using the pension cost rate derived from the actuarial valuation at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant curtailments, settlements, or other significant one-off events. Also, the related information is disclosed accordingly.

C. Employees', directors' and supervisors' remuneration

Employees' remuneration and directors' and supervisors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates.

(28) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

- C. Deferred income tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.
- D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.
- F. A deferred tax asset shall be recognised for the carryforward of unused tax credits resulting from acquisitions of equipment or technology and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilised.
- G. The interim period income tax expense is recognised based on the estimated average annual effective income tax rate expected for the full financial year applied to the pretax income of the interim period, and the related information is disclosed accordingly.

(29) Share capital

- A. Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.
- B. Where the Company repurchases the Company's equity share capital that has been issued, the consideration paid, including any directly attributable incremental costs (net of income taxes) is deducted from equity attributable to the Company's equity holders. Where such shares are subsequently reissued, the difference between their carrying amount and any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the Company's equity holders.

(30) Dividends

- A. Dividends are recorded in the Company's financial statements in the period in which they are resolved by the Company's shareholders. Cash dividends are recorded as liabilities.
- B. For the shareholders' dividends that should be distributed in cash, the Company's Board of Directors would be adopted by a majority vote at a meeting of the Board of Directors attended by two-thirds of the total number of directors, and then reported to the shareholders. The provisions that must be resolved by the shareholders' meeting shall not apply.

(31) Revenue recognition

Sales of goods

- A. The Group manufactures and sells a variety of petrochemical products, including the spinning, weaving, dyeing and finishing of rayon and nylon fiber. Sales are recognised when control of the products has transferred, being when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products.
- B. The amount of sales revenue recognised is equal to the contract price net of volume discounts and sales discounts and allowances. Volume discounts and sales discounts and allowances are estimated based on historical information, and a refund liability is recognised for expected volume discounts and sales discounts and allowances payable to customers in relation to sales made until the end of the reporting period. The sales usually are made with a credit term of 30 to 120 days. As the time interval between the transfer of committed goods or service and the payment of customer does not exceed one year, the Group does not adjust the transaction price to reflect the time value of money.
- C. A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

(32) Business combinations

- A. The Group uses the acquisition method to account for business combinations. The consideration transferred for an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the acquisition date, plus the fair value of any assets and liabilities resulting from a contingent consideration arrangement. All acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. For each business combination, the Group measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity's net assets in the event of liquidation at either fair value or the present ownership instruments' proportionate share in the recognised amounts of the acquiree's identifiable net assets. All other non-controlling interests should be measured at the acquisition-date fair value.

B. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the acquisition date. If the total of consideration transferred, non-controlling interest in the acquiree recognised and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognised directly in profit or loss on the acquisition date.

(33) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments.

5. Critical Accounting Judgements, Estimates and Key Sources of Assumption Uncertainty

The preparation of these consolidated financial statements requires management to make critical judgements in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. The information is addressed below:

(1) Critical judgements in applying the Group's accounting policies

None.

(2) Critical accounting estimates and assumptions

A. Impairment assessment of accounts receivable

In the process of assessing impairment of accounts receivable, the Group must use judgements and assumptions to determine the collectability of accounts receivable. The collectability is affected by various factors: customers' financial conditions, the Group's internal credit ratings, historical experience, etc. When sales are not expected to be collected, the Group recognises a specific allowance for doubtful receivables after the assessment. The assumptions and estimates of loss allowance provided for accounts receivable are based on concerning future events as that on the balance sheet date. Assumptions and estimates may differ from the actual results which may result in material adjustments.

B. Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Group must determine the net realisable value of inventories on balance sheet date using judgements and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value.

As of June 30, 2026, the carrying amount of inventories was \$41,413,755.

6. Details of Significant Accounts

(1) Cash and cash equivalents

	June 30, 2026	December 31, 2025	June 30, 2025
Cash on hand and petty cash	\$ 44,835	\$ 60,730	\$ 73,354
Checking accounts and demand deposits	7,167,608	5,793,310	8,559,326
Cash equivalents			
Time deposits	8,977,772	6,142,321	11,532,515
Bonds repurchased and commercial paper	2,245,825	5,197,794	2,634,500
	<u>\$ 18,436,040</u>	<u>\$ 17,194,155</u>	<u>\$ 22,799,695</u>

- A. The Group transacts with a variety of financial institutions all with high credit quality to disperse credit risk, so it expects that the probability of counterparty default is remote. Loss allowance is measured using 12-month expected credit losses. For the six-month periods ended June 30, 2026 and 2025, the Group did not recognise any loss allowance.
- B. The Group repatriated the capital in the amount of US\$44,221 thousand in accordance with “The Management, Utilisation, and Taxation of Repatriated Offshore Funds Act” in June 2021. As of June 30, 2026 and 2025, the undrawn capital amounted to \$248,288 and \$441,948, respectively, which was restricted under the “The Management, Utilisation, and Taxation of Repatriated Offshore Funds Act”. However, according to IFRS Q&A amended by the competent authority on January 5, 2024, the restriction from the Act did not change the nature of deposits, therefore, the capital was still listed in ‘cash and cash equivalent’.
- C. The Group participated in the urban renewal project planned for Formosa Plastics Building and entered into a trust contract with Mega International Commercial Bank as well as set the trust accounts. Payments reserved in the trust accounts shall be earmarked, excluding related expenses for payments of construction and taxes, and no payment can be drawn from the trust account during the duration of trust. As of June 30, 2026 and 2025, the balance of trust accounts was \$632,596 and \$743,912, respectively. As the trust accounts were pledged to others as collateral, they had been classified as “non-current financial assets at amortised cost”.
- D. As the Group applied for the government subsidy projects from the Ministry of Economic Affairs, certain demand deposits were pledged as collateral. As of June 30, 2026 and 2025, cash pledged to others as collateral amounting to \$107,517 and \$97,317, respectively, had been classified as “non-current financial assets at amortised cost”.
- E. The Group has no cash and cash equivalents pledged to others.

- A. On March 14, 2025, the Company signed a \$2,000,000 commercial paper issuance agreement with China Bills Finance Corporation, who agreed to act as an underwriter of commercial paper issued by the Company. Under the terms of the agreement, the Company must issue commercial paper with maturity of no less than 31 days in the contractual period. The agreement period is from March 26, 2025 to March 25, 2028. If the Company does not issue the full amount or interrupt the issuance (non-termination) during the period the agreement is in effect, it is required to pay a penalty to the other party at an annual interest rate of 1% based on the unfulfilled credit limit quarterly. If the Company terminates the agreement, it is required to immediately pay a penalty in lump sum to the other party at an annual interest rate of 1% from the termination date

to the expiration date of the agreement period.

The Company has fully repaid the above-mentioned commercial paper payable in January, 2026.

- B. On March 21, 2025, the Company signed a \$2,500,000 non-guarantee commercial paper issuance agreement with Grand Bills Finance Corporation, who agreed to act as an underwriter of commercial paper issued by the Company. Under the terms of the agreement, the Company must issue commercial paper with maturity of no higher than 90 days in the contractual period. The agreement period is from April 11, 2025 to April 10, 2028. If the Company does not issue as agreed in the agreement, it is required to pay a commitment fee to the other party at an annual interest rate of 0.5% at the end of each quarter, which is based on the unissued amount for the actual period of non-issuance. If the Company defaults the agreement, the other party may refuse to fulfill the agreement and request the Company to settle all debts in lump sum according to the agreement. If the Company defaults the agreement, the Company shall be responsible for fully repaying the amount of all unredeemed notes when the commercial paper, which was underwritten and purchased according to the agreement, cannot be redeemed as scheduled, and the Company shall pay a delay interest to the bearer at an annual interest rate of 6% from the maturity date of the notes to the date of the repayment. Additionally, the Company is required to additionally pay a penalty of 10% of the delay interest. If the repayment of the notes is delayed for more than six months, the Company is required to additionally pay a penalty of 20% of the delay interest.

The Company has fully repaid the above-mentioned commercial paper payable in January, 2026.

- C. The Company entered into a \$15,000,000 commercial paper revolving issuance agreement on July 21, 2025 with five underwriting institutions, namely Mega Bills Finance Corporation, International Bills Finance Corporation, China Bills Finance Corporation, Taiwan Bills Finance Corporation, and E.Sun Commercial Bank, Ltd., under which the bills finance companies act as certified underwriters for the issuance of commercial paper. Pursuant to the agreement, the Company is required to issue commercial paper within the contract period, with each issuance having a tenor of no less than 61 days and no more than 90 days. The contract period is from October 20, 2025 to October 21, 2030. If the actual utilized underwriting balance does not reach the total committed underwriting facility, the Company shall pay a commitment fee on the shortfall at an annual rate of 0.60%, calculated from the day following the expiry of three months after such shortfall arises to the end of the underwriting period, in lump sum. In the event the Company suspends issuance, the suspended portion of the underwriting facility may no longer be utilized, and a commitment fee at an annual rate of 0.60% shall be charged on such suspended amount from the date of suspension to the end of the underwriting period, payable in a lump sum. If there is no agreed-upon event for suspension by the Company, but any individual underwriter fails to perform its underwriting obligations in accordance with the agreement, such underwriter shall pay a commitment fee on the difference between its actual underwriting balance and committed underwriting amount at an annual rate of 0.60%, based on the actual number of days of suspension, in lump sum. In the event of default by the Company, the Company's right to utilize

the underwriting facility shall be immediately and automatically suspended, and the syndicate of underwriters may, by majority resolution, terminate the agreement or renegotiate the underwriting facility, interest rates, and fees without being bound by other terms of the agreement. If the Company fails to pay underwriting fees or other related charges as required under the agreement, such amounts may be added to the principal of this contract and shall accrue interest at the default interest rate. If any principal or interest remains unpaid and overdue for six months (inclusive) or less, a penalty shall be charged at 10% of the default interest rate; for any period exceeding six months, a penalty at 20% of the default interest rate shall be charged on the portion exceeding six months.

The Company has fully repaid the above-mentioned commercial paper payable from January to February, 2026.

- D. In accordance with the IFRS Q&A ‘Questions on the classification of liabilities arising from funds obtained through the enterprises’ revolving issuance of commercial paper’ issued by Accounting Research and Development Foundation of the R.O.C. (ARDF) on December 31, 2025, the Group’s commercial paper of \$13,482,693 should be classified as current liabilities. However, pursuant to the applicable regulations in relation to the aforementioned Q&A issued by the Securities and Futures Bureau, Financial Supervisory Commission, the Group elected to classify these borrowings as non-current liabilities.

(13) Pensions

- A. (a) The Company and its domestic subsidiaries have a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees’ service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company and its domestic subsidiaries contribute monthly an amount equal to 2% of the employees’ monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company and its domestic subsidiaries would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company and its domestic subsidiaries will make contributions for the deficit by next March.
- (b) For the aforementioned pension plan, the Group recognized pension costs of \$13,341, \$16,685, \$27,004 and \$33,639 for the three-month and six-month periods ended June 30, 2026 and 2025, respectively.

(c) Expected contributions to the defined benefit pension plans of the Group for the year ending December 31, 2026 amount to \$74,847.

B. (a) From July 1, 2005, the Company and its domestic subsidiaries have established a defined contribution pension plan (the “New Plan”) under the Labor Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company and its domestic subsidiaries contribute monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.

(b) The Company’s mainland subsidiaries have a defined contribution plan. Monthly contributions to an independent fund administered by the government in accordance with the pension regulations in the People’s Republic of China (PRC) are based on certain percentage of employees’ monthly salaries and wages. The contribution percentage was 10~20% for the three-month and six-month periods ended June 30, 2026 and 2025. Other than the monthly contributions, the Group has no further obligations.

(c) The pension costs under the defined contribution pension plans of the Group for the three-month and six-month periods ended June 30, 2026 and 2025 were \$112,333, \$104,854, \$224,018 and \$223,785, respectively.

(14) Capital stock

A. As of June 30, 2026, the Company’s authorised and paid-in capital was \$58,611,863, and total issued stocks was 5,861,186 thousand shares with a par value of \$10 per share. All proceeds from shares issued have been collected.

Movements in the number of the Company’s ordinary shares (thousand) outstanding are as follows:

C. The market value of treasury stocks was \$54.6 and \$22.9 (in dollars) per share at June 30, 2026 and 2025, respectively.

D. The above treasury stocks of the parent company were purchased by subsidiaries.

(15) Capital surplus

Pursuant to the R.O.C. Company Act, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Group has no accumulated deficit. Further, the R.O.C. Securities and Exchange Act requires that the amount of capital surplus to be capitalised mentioned above should not exceed 10% of the paid-in capital each year. Capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.

(16) Retained earnings

A. Under the Company's Articles of Incorporation, the current year's earnings, if any, shall first be used to pay all taxes and offset prior years' operating losses and then 10% of the remaining amount shall be set aside as legal reserve. However, if the amount of the legal reserve is equal to the paid-in capital, this provision shall not apply. In addition, the remaining balance is to be set aside as special reserve if necessary. The remaining balance for current year, after allocating for interest on capital, shall be accumulated with remaining balance of previous year and to be distributed as shareholders' bonus proposed by the Board of Directors. The distribution of cash dividends shall be adopted by a majority vote at a meeting of the Board of Directors attended by two-thirds of the total number of directors, and then reported to the shareholders. The distribution of stock dividends shall be reported to the shareholders for resolution.

The special reserve includes:

- (a) Reserve for a special purpose;
- (b) Investment income recognised under equity method and deferred income tax assets arising from unused investment tax credits which are deemed unrealised and transferred to special reserve. Such investment income and deferred income tax assets are reclassified to unappropriated earnings only when they are realised;
- (c) Net unrealised gains from financial instruments transactions. The special reserve for unrealised gains from financial instruments is reduced when the accumulated value of the unrealised gains also decreases; and

- (d) Other special reserves as stipulated by other laws.
- B. The Company is in the mature stage and the profit is stable. The Board of Directors shall establish the cash dividend or stock dividend percentage. At least 50% of the distributable earnings after deducting the legal reserve, directors' and supervisors' remuneration, employee bonus and special reserves shall be distributed to stockholders. The Company would prefer cash dividends. If the Company requires funds for significant investments or needs to improve its financial structure, part of the dividend will be in the form of stocks which shall not exceed 50% of the total dividends.
- C. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.
- D. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.
- E. The appropriations of 2025 and 2024 earnings had been resolved at the stockholders' meeting on May 27, 2026 and June 10, 2025, respectively. Details are as follows:

	For the years ended December 31,

- A. In accordance with the Articles of Incorporation of the Company, a ratio of the current year's pre-tax profit before deducting employees' compensation, if any, shall be distributed as employees' compensation. The ratio shall not be lower than 0.05% and shall not be higher than 0.5% for employees' compensation, of which no lower than 0.02% and no higher than 0.2% of the current year's pre-tax profit before deducting employees' compensation shall be distributed for adjusting the salaries or distributing the compensation to the rank-and-file employees. If the Company has an accumulated deficit, earnings should be reserved to cover deficit.
- B. For the three-month and six-month periods ended June 30, 2026, employees' remuneration (bonuses) was accrued at \$6,226 and \$12,953, respectively. The aforementioned amount was recognised in salary expenses. For the three-month and six-month periods ended June 30, 2025 and the year ended December 31, 2025, employees' remuneration (bonuses) was not accrued due to the loss before tax.

For the three-month and six-month periods ended June 30, 2026, the employees' compensation was estimated and accrued based on approximately 0.1% of the distributable profit.

Information about the appropriations of employees' bonus and directors' and supervisors' remuneration by the Company as proposed by the Board of Directors and resolved by the stockholders will be posted in the "Market Observation Post System" at the website of the Taiwan Stock Exchange.

To secure the rights of its shareholders, the Company is required to issue a promissory note to ensure the borrower will fulfill its obligation for repayment.

(5) Contingencies - litigation

- A. Taiwan Cooperative Bank Co., Ltd. (hereinafter referred to as TCB) filed a civil lawsuit against the Group's subsidiary, Formosa Taffeta Co., Ltd. ("Formosa Taffeta") with the Taipei District Court in September 2019. TCB claimed that the former employees of Formosa Taffeta colluded with New Site Industries Inc. (hereinafter referred to as New Site) and New Brite Industries Inc. (hereinafter referred to as New Brite) to make false statements. TCB was misled with the fact that New Site and New Brite has accounts receivable due from Formosa Taffeta, causing damage to TCB. Therefore, TCB claimed that Formosa Taffeta should be jointly and severally liable with the obligation of indemnity. However, this case arose purely as a result of the personal behavior of the former employee. In its adjudication dated October 29, 2024, the Taiwan High Court has ordered that Formosa Taffeta is jointly liable to compensate TCB for the amount of \$290,657 and any requested interest. However, based on legal opinion, it should be noted that the second instance

ruling still did not fully consider several vital defenses raised by Formosa Taffeta and proportional responsibility of both parties. Formosa Taffeta filed a third appeal on December 13, 2024. The Supreme Court set aside the second instance judgment and remanded the case to the High Court on November 19, 2025. As of August 7, 2026, the case has not yet proceeded to trial. As such, the ultimate outcome of the appeal and amount of the lawsuit cannot presently be determined. Formosa Taffeta has retained legal counsel to submit a strong defense to safeguard its interests.

- B. DBS (Taiwan) Commercial Bank Co., Ltd. (hereinafter referred to as DBS) filed a civil lawsuit against the Group's subsidiaries, Formosa Taffeta Co., Ltd. ("Formosa Taffeta") and Formosa Taffeta Dong Nai Co., Ltd. ("Formosa Taffeta Dong Nai") with the Taipei District Court in September 2019. The former employees of Formosa Taffeta and Formosa Taffeta Dong Nai colluded with New Site Industries Inc. (hereinafter referred to as New Site) to make false statements. DBS was misled with the fact that New Site has accounts receivable due from Formosa Taffeta and Formosa Taffeta Dong Nai, causing damage to DBS. Therefore, DBS claimed that Formosa Taffeta should be jointly and severally liable with the obligation of indemnity. However, this case arose purely as a result of the personal behavior of the former employee. In its adjudication dated December 30, 2022, the Taipei District Court has rejected the claims filed by DBS. Consequently, DBS filed an appeal in January 2023. The ultimate outcome of the appeal and amount of the lawsuit cannot presently be determined. However, Formosa Taffeta and Formosa Dong Nai have engaged lawyers to submit a strong defense to protect their rights and interests.
- C. O-Bank filed a civil lawsuit against the Group's subsidiaries, Formosa Taffeta Co., Ltd. ("Formosa Taffeta") and Formosa Taffeta Dong Nai Co., Ltd. ("Formosa Taffeta Dong Nai") with the Taipei District Court in February 2020. The former employees of Formosa Taffeta and Formosa Taffeta Dong Nai colluded with I Chin Young Inc. (hereinafter referred to as I Chin Young) to make false statements. O-Bank was misled with the fact that I Chin Young has accounts receivable due from Formosa Taffeta and Formosa Taffeta Dong Nai, causing damage to O-Bank. Therefore, O-Bank claimed that Formosa Taffeta and Formosa Taffeta Dong Nai should be jointly and severally liable with the obligation of indemnity. However, this case arose purely as a result of the personal behavior of the former employee. In its adjudication dated May 20, 2026, the Taiwan High Court has ordered that the Company and Formosa Dong Nai are jointly liable to compensate O-Bank for the amount of NT\$328,895 and any requested interest. However, based on legal opinion, it should be noted that the second instance ruling still did not fully consider several vital defenses raised by Formosa Taffeta and proportional responsibility of both parties. Formosa Taffeta filed a third appeal. As such, the ultimate outcome of the appeal and amount the lawsuit cannot presently be determined. Formosa Taffeta has retained legal counsel to submit a strong defense to safeguard its interests.

12. Others

(1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet plus net debt.

The Group's management strategy of its debt-to-capital ratio for the six-month period ended June 30, 2026 is the same as that for the six-month period ended June 30, 2025. As of June 30, 2026, December 31, 2025 and June 30, 2025, the Group's debt-to-capital ratio was 16%, 22% and 30%, respectively.

Note: Financial assets measured at amortised cost include cash and cash equivalents, financial assets measured at amortised cost, accounts and notes receivable (including related parties), other receivables (including related parties), and refundable deposits. Financial liabilities measured at amortised cost include short-term borrowings, short-term notes and

bills payable, accounts payable (including related parties), notes payable, other payables (including related parties), long-term borrowings (including those maturing within one year or one business cycle), corporate bonds payable (including those maturing within one year or one business cycle), and guarantee deposits received.

B. Financial risk management policies

- (a) The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. To minimize any adverse effects on the financial performance of the Group, derivative financial instruments, such as foreign exchange forward contracts and foreign currency option contracts are used to hedge certain exchange rate risk.
- (b) Risk management is carried out by a central treasury department (Company treasury) under policies approved by the board of directors. Company treasury identifies, evaluates and hedges financial risks in close cooperation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

- i. The Group is exposed to foreign exchange risk arising from the transactions of the Company and its subsidiaries used in various functional currency, primarily with respect to the USD and RMB. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities.
- ii. Management has set up a policy to manage its foreign exchange risk against its functional currency. Each entity hedges its entire foreign exchange risk exposure.

iii. The Group's businesses involve some non-functional currency operations (the Company's and certain subsidiaries' functional currency: NTD; other certain subsidiaries' functional currency: USD, VND and RMB). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

iv. Total exchange gain (loss), including realised and unrealised arising from significant foreign exchange variation on the monetary items held by the Group for the three-month and six-month periods ended June 30, 2026 and 2025 amounted to (\$4,550), (\$2,332,623), \$341,374 and (\$2,263,773), respectively.

Price risk

- i. The Group's equity securities, which are exposed to price risk, are the held financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.
- ii. The Group's investments in equity securities comprise domestic listed, beneficiary certificate and fund. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, components of equity for the six-month periods ended June 30, 2026 and 2025 would have increased/decreased by \$15,274 and \$13,781, respectively, as a result of gains/losses on equity securities classified as at fair value through profit or loss. Other components of equity would have increased/decreased by \$2,812,696 and \$863,330, respectively, as a result of other comprehensive income on equity investments classified as at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

- i. The Group's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the Group to cash flow interest rate risk which is partially offset by cash and cash equivalents held at variable rates. Borrowings issued at fixed rates expose the Group to fair value interest rate risk. During the six-month periods ended June 30, 2026 and 2025, the Group's borrowings at variable rate were denominated in the NTD and USD.
 - ii. The Group's borrowings are measured at amortised cost. The borrowings are periodically contractually repriced and to that extent are also exposed to the risk of future changes in market interest rates.
 - iii. For the six-month periods ended June 30, 2026 and 2025, if interest rates on borrowings had been 1% higher/lower with all other variables held constant, post-tax profit for the six-month periods then ended would have been \$249,961 and \$405,494 lower/higher, respectively, mainly as a result of higher/lower interest expense on floating rate borrowings.
- (b) Credit risk
- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms, classified as the contract cash flows of instruments stated at amortised cost at fair value through other comprehensive income.
 - ii. The Group manages its credit risk taking into consideration the entire group's concern. For banks and financial institutions, only independently rated parties with a minimum rating of 'A' are accepted. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Board of Directors. The utilisation of credit limits is regularly monitored.
 - iii. The Group adopts the assumption under IFRS 9, that is, to assess whether there has been a significant increase in credit risk on that instrument since initial recognition.
 - iv. The Group wrote-off the financial assets, which cannot be reasonably expected to be recovered, after initiating recourse procedures. However, the Group will continue executing the recourse procedures to secure their rights. On June 30, 2026, December 31, 2025 and June 30, 2025, the Group's written-off financial assets that are still under recourse procedures amounted to \$44,955 for all periods.

- v. The Group used the forecastability of Directorate-General of Budget, Accounting and Statistics, Executive Yuan and Taiwan Institute of Economic Research boom observation report to adjust historical and timely information to assess the default possibility of accounts receivable, contract assets and lease payments receivable. As of June 30, 2026, December 31, 2025 and June 30, 2025, the provision matrix is as follows:

	Not past due	Up to 30 days past due	31~90 days past due	Over 91 days past due
<u>At June 30, 2026</u>				
Expected loss rate	0.15%~21.00%	0.05%~100%	0.05%~100%	44.47%~100%
Total book value	\$ 27,501,593	\$ 202,381	\$ 65,949	\$ 11,519
Loss allowance	\$ 63,874	\$ 6,648	\$ 2,557	\$ 7,621
<u>At December 31, 2025</u>				
Expected loss rate	0.08%~30.00%	0.05%~8.96%	0.05%~100%	49.21%~100%
Total book value	\$ 22,822,578	\$ 184,731	\$ 33,098	\$ 39,074

Loss allowance	\$ 73,295	\$ 5,910	\$ 3,125	\$ 7,784

The ageing analysis of accounts receivable that were past due but not impaired is as follows:

	June 30, 2026	December 31, 2025	June 30, 2025
Not past due	\$ 27,501,593	\$ 22,822,578	\$ 25,751,773

	<u>\$ 27,781,442</u>	<u>\$ 23,079,481</u>	<u>\$ 25,992,411</u>

The above ageing analysis was based on past due date.

- vi. Movements in relation to the Group applying the simplified approach to provide loss allowance for notes and accounts receivable and contract assets are as follows:

	2026		
	Accounts receivable	Contract assets	Notes receivable
At January 1	\$ 79,651	\$ -	\$ -
Effect of exchange rate changes	1,049	-	-
At June 30	<u>\$ 80,700</u>	<u>\$ -</u>	<u>\$ -</u>

	2025

Effect of exchange rate changes	(1,992)	-	-
At June 30	<u>\$ 90,114</u>	<u>\$ -</u>	<u>\$ -</u>

(c) Liquidity risk

- i. Cash flow forecasting is performed in the operating entities of the Group and aggregated by Company treasury. Company treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the Group's debt financing plans, covenant compliance, compliance with internal balance sheet ratio targets and, if applicable, external regulatory or legal requirements, for example, currency restrictions.
- ii. Surplus cash held by the operating entities over and above balance required for working capital management are transferred to the Group treasury. Group treasury invests surplus cash in interest bearing current accounts, loans to related parties, time deposits and cash equivalents, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the abovementioned forecasts.
- iii. The table below analyses the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

Non-derivative financial liabilities:

		Between 1	Between 3	
<u>June 30, 2026</u>	<u>Less than 1 year</u>	<u>and 2 years</u>	<u>and 5 years</u>	<u>Over 5 years</u>
Lease liability	\$ 184,019	\$ 155,981	\$ 280,838	\$ 470,553
Bonds payable	5,006,650	5,329,850	17,151,600	2,728,375
Long-term borrowings	6,513,925	21,046,732	3,684,446	-

Non-derivative financial liabilities:

		Between 1	Between 3	
<u>December 31, 2025</u>	<u>Less than 1 year</u>	<u>and 2 years</u>	<u>and 5 years</u>	<u>Over 5 years</u>

Bonds payable	12,635,000	4,991,050	19,519,310	2,278,375
Long-term borrowings	10,543,240	21,399,685	16,645,295	-

Non-derivative financial liabilities:

<u>June 30, 2025</u>	<u>Less than 1 year</u>	<u>Between 1 and 2 years</u>	<u>Between 3 and 5 years</u>	<u>Over 5 years</u>
Lease liability	\$ 218,519	\$ 207,093	\$ 410,421	\$ 337,441
Bonds payable	10,950,000	4,600,000	10,850,000	950,000
Long-term borrowings	7,005,051	25,001,200	18,680,458	-

Except for the aforementioned liabilities, the Group's non-derivative financial liabilities will mature within one year.

- iv. The Group does not expect the timing of occurrence of the cash flows estimated through the maturity date analysis will be significantly earlier, nor expect the actual cash flow amount will be significantly different.

(3) Fair value estimation

- A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks is included in Level 1.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in stock investment, private equity fund market, and most derivative instruments is included in Level 2.

Level 3: Inputs for the asset or liability that are not based on observable market data.

- B. Financial instruments not measured at fair value

The carrying amounts of cash and cash equivalents, notes receivable (including related parties), accounts receivable (including related parties), other receivables (including related parties), short-term borrowings, short-term notes and bills payable, notes payable, accounts payable (including related parties) and other payables (including related parties) are approximate to their fair values. The carrying amounts of long-term borrowings (including current portion) and lease liabilities are reasonable basis for fair value estimate given that their interest rates are approximate to market rates.

C. The related information on financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities are as follows:

D. The methods and assumptions the Group used to measure fair value are as follows:

- (a) The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	<u>Listed shares</u>	<u>Open-end fund</u>
Market quoted price	Closing price	Net asset value

- (b) Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.
- (c) When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
- (d) The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate. Structured interest derivative instruments are measured by using appropriate option pricing models (i.e. Black-Scholes model) or other valuation methods, such as Monte Carlo simulation.
- (e) The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
- (f) The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.

E. For the six-month periods ended June 30, 2026 and 2025, there was no transfer between Level 1 and Level 2.

F. The following chart is the movement of Level 3 for the six-month periods ended June 30, 2026 and 2025:

	2026
	<u>Non-derivative equity instrument</u>
At January 1	\$ 30,226,295
Gains and losses recognised in other comprehensive income	
Recorded as unrealised gains on valuation of investments in equity instruments measured at fair value through other comprehensive income	4,766,536

Proceeds from capital reduction	(17,500)
At June 30	<u>\$ 25,413,437</u>

G. For the six-month periods ended June 30, 2026 and 2025, there was no transfer into or out from Level 3.

H. The Group Treasury is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value. The Treasury sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments and ensure compliance with the related requirements in IFRS. The related valuation results are reported to Accounting Division monthly. Accounting Division is responsible for managing and reviewing valuation processes.

I. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value at June 30, 2026	Fair value at December 31, 2025	Fair value at June 30, 2025	Valuation technique	Significant unobservable input	Relationship of inputs to fair value
Non-derivative equity instrument :						
Unlisted shares	\$ 26,527,402	\$ 20,851,279	\$ 16,699,978	Market comparable companies	Price to earnings ratio multiple, price to book ratio multiple, enterprise value to operating income ratio multiple, enterprise value to EBITA multiple, discount for lack of marketability	The higher the multiple, the higher the fair value
	736,658	1,058,131	892,142	Discounted cash flow	Long-term revenue growth rate, weighted average cost of capital, long-term pre-tax operating margin, discount for lack of marketability, discount for lack of control	The higher the long-term revenue growth rate and long-term pre-tax operating margin, the higher the fair value
	7,725,963	8,316,885	7,821,317	Net asset value	Not applicable	Not applicable

J. The Group has carefully assessed the valuation models and assumptions used to measure fair value. However, use of different valuation models or assumptions may result in different measurement. The following is the effect on profit or loss or on other comprehensive income from financial assets and liabilities categorised within Level 3 if the inputs used to valuation models have changed:

				June 30, 2026

14. Segment Information

(1) General information

The Group's reportable segments are strategic business units and provide different products and services. Strategic business units are separately managed because each unit needs different techniques and marketing strategies. The Group's reportable segments are as follows:

1st Petrochemical Div: responsible for production of benzene, p-xylene and o-xylene.

2nd Petrochemical Div: responsible for production of styrene, synthetic phenolic and acetone.

3rd Petrochemical Div: responsible for production of purified terephthalic acid.

Plastics Division: responsible for production of ABS resin, polypropylene and PS.

Formosa Taffeta Co., Ltd.: responsible for production of blended fabric, spun fabric, cross-woven fabric, polyamine and polyester fabric, epidemic fabric, designer sportswear fabric, high-tech and function fabric, tire cord fabric, pure cotton yarn, blended yarn, various functional yarn, fireproof fabric, anti-static cloth and industrial fabric, and operation of petrol stations to sell petroleum, diesel fuel, kerosene and small package of petroleum products and provide car wash services.

Green Energy Division: responsible for solar energy and small hydropower generation.

(2) Measurement of segment information

The Group has not yet amortised tax expenses or non-recurring gains and losses to reportable segments. Further, not all reportable segments' profit or loss include significant non-cash items besides depreciation and amortization. Reporting amount and reports for operating decision-maker are the same.

The Group's operating segment profit or loss is measured based on operating income before tax for performance assessment basis. The Group considers the sale and transfer among segments as transactions with third parties and measured at market price.
